

FALL FEMALE CLASSIC SALE

AND

LEGACY AT PINE HILL'S

MINI

PRODUCTION SALE

Saturday, October 22, 2016 • 12 NOON

HOSTED BY:

Woodside Farm South

New Market, VA

at THE Round Barn

Northern Virginia Angus Association

On behalf of the Northern Virginia Angus Board members and the Northern Virginia Angus Association, we would like to invite each of you to our NVAA Fall Female Classic Sale on Saturday, October 22, 2016. And be sure to note our New Location: Woodside Farm South – New Market, VA.

This year's consignors have brought some of their best to showcase their respective herds – plus, Legacy at Pine Hill has chosen our sale to offer you what many consider a mini-production sale! The offering is loaded with quality genetics from top to bottom and you are sure to find what works in your herd. You will have the opportunity to choose from the largest selection we have had the privilege to present.

Northern Virginia Angus Association would like to thank Woodside Farms for hosting this year's event in their auxiliary location – Woodside Farm South – New Market, VA – at THE Round Barn. David, Paige and Trey have been very gracious hosts these past few years and we appreciate their hospitality.

I would like to take this opportunity to thank the Northern Virginia Angus Board members and Tom Templeton for their dedication and enthusiasm to bring this sale together, and Rebecca Webert of Black Locust Livestock LLC for doing the catalog. Additionally, I wish to thank Steve and Anne Jones for entrusting us with their mini-production sale to market their cattle.

If you have any questions about this sale offering, feel free to contact any of the Northern Virginia Angus Board members, the Fall Female Classic consignors or Tom Templeton. We look forward to seeing you on October 22nd.

Sincerely,

Chuck Alexander
NVAA President

Dear Cattle Friends and Neighbors,

The upcoming Northern Virginia Angus Association Fall Female Classic and Legacy at Pine Hill "Mini" Production Sale promises to be an exciting event for those folks interested in high quality Angus cattle. First of all and most importantly, we want to say thank you to the David Gum Family for giving fellow breeders the opportunity to be guests at Woodside South and to work with the group of breeders from the area to put on this Angus Sale.

The Northern Virginia Angus Association has been one of the most active groups in the state when events and activities of Angus cattle become a reality and bringing people together. They have held sales at well-known farms like Glenara, Hill Crest, Locust Hill, Annefield, Byrnley, Woodside North and South. A "big" hand goes out to Chuck Alexander, his Board of Directors and the membership for the ongoing support towards Angus activities like sales, Field Days, Annual meetings, Junior activities, etc.

President Chuck approached me after the Va. Beef Expo "Gift" Sale to ask if I would give a hand in soliciting good Angus cattle and assist with the management of the Fall Female Classic. I agreed, we pursued and we did it and here we are with 70 plus females.

As you notice when reading the catalog, you will have the opportunity to acquire seedstock from these solid breeders in addition to purchasing some very young females from Anne and Steve Jones at Legacy at Pine Hill. All of the cattle offered will be sired by or have calves at side sired by nationally recognized bulls. Some cattle will have genomically enhanced EPD's.

October 22nd will be an exciting day when we congregate at "The" famous Round Barn to conduct this auction of high quality Angus females. Jason Arehart and Tim Douglas have opened the gates wide at Woodside South for this event. Again, we say thank you to the Gum Family for the opportunity to enjoy this beautiful, historic Angus farm in the Shenandoah Valley.

A lunch will be served on sale day and refreshments served on Friday for you early birds. So make plans, get a motel room early if you are traveling, do some looking, enjoy the sites at Woodside and pick out a few cows during this Virginia Angus function in the Valley.

See you on the 22nd and call me if you have a question about anything pertaining to the sale. We look forward to "THE" event.

Sincerely,
Tom Templeton

FALL FEMALE CLASSIC SALE

LEGACY AT PINE HILL'S & MINI PRODUCTION SALE

Saturday, October 22, 2016 • 12 NOON • Woodside South

Auctioneer:

Dave Mullins, Danville, IN.....(317)503-2798

Sale Manager:

Tom Templeton.....(540)421-8341

Ringmen and Publication Representatives:

Chris Jeffcoat, Angus Journal.....(717)476-1496

Chris Wojciechowski.....(540)292-0841

Scott Weller.....(540)294-0555

Special Assignment:

John Hausner.....(717)968-0971

Sale Consultants:

Virginia Angus Association.....(540)337-3001

Chris Wojciechowski.....(540)292-0841

Buyers unable to attend may send their bids to the Sales Consultants, Regional Manager, Ringmen, Sale Manager or Auctioneer.

Sale Day Phones:

Tim Douglas.....(540)539-1811

Chuck Alexander.....(540)533-5669

Sale Location:

Woodside South
13789 North Valley Pike, New Market, VA
David, Paige and Trey Gum, Owners
Trey's Cell: (540)974-8659

Woodside Farms South is located on US Route 11, 4 miles south of New Market (Exit 264 off I-81) or 4 miles north of Exit 257 on I-81..

Health:

Health papers will be available for immediate interstate shipping.

Inspection of Sale Offering:

Cattle will be available for viewing after 2:00 p.m. on Friday, October 21, 2016 at the sale location.

Terms and Conditions:

Cattle sell under the standard terms and conditions as recommended by the American Angus Association. Settlement is required immediately following the sale, prior to load out, unless arrangements have made with the Northern Virginia Angus Association.

Trucking:

Livestock haulers believed to be reliable will be available.

Accommodations:

Quality Inn, New Market.....540-740-3141

Days Inn, New Market.....540-740-4100

Holiday Inn Express, Woodstock.....540-459-5000

Hampton Inn, Woodstock.....540-459-7111

Comfort Inn, Woodstock.....800-992-2694

Insurance:

Livestock mortality insurance will be available at the clerks desk.

Ear Tags:

Eartags on the cattle will correspond to their lot numbers in the sale book.

Announcements:

Announcements made from the auction block during the sale take precedence over printed material in this sale book and on the update sheet.

An update sheet will be available on sale day to update breeding information or general information on cattle selling.

The EPDs represented in this sale catalog were current at the time requested for printing. Twice annually, EPDs are re-calculated by the American Angus Association, which means the figures represented in this catalog may change for these animals in the future.

Sale Sponsored by:

Northern Virginia Angus Association

John Gundzik

• Here is a high growth female and sired by a son of the highly recognized Extra k205 with some Hinman Angus influence on the bottom.
 This 3 yr old will be close to calving or have a calf by VAR Discovery 2240, the AAR Ten X son raised at Vintage and housed at Accelerated Genetics. This calf could pay the bill.

Legacy at Pine Hill

• A daughter of the highly proven cow maker Bismarck, known for his beautiful daughters in production! 240 is a low birth weight female from a proven cow family that traces back to the famous 2114 cow. The grandam, 0062 has been a dominant producer for Steve and Anne, producing very functional, high quality offspring. Their participation in BCIA Bull Sales and high lighted consignment sales has been very well received by fellow cattlemen. Females like 240 are the reason. They raise the right kind.
 •Sells with a heifer calf, Lot 66A, born 9/9/16 by Bruin Uproar, the Sitz Upward 307R son and out of VRD's full sister. Uproar offers muscle mass, rib shape, eye appeal, and good foot structure in a moderate package.

American Angus Association® Selection Tools

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

GROWTH

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height EPD (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight EPD (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height EPD (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis.

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for pre-weaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Grid Value (\$G), an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Quality Grade (\$QG) represents the quality grade segment of the economic advantage found in \$G. \$QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD, which is influenced by carcass marbling scores and ultrasound percent intramuscular fat (% IMF) measurements, contribute to \$QG.

Yield Grade (\$YG) \$YG represents the yield grade segment of the economic advantage found in \$G. \$YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.

\$G combines both \$QG and \$YG, and may be the best carcass decision tool for focusing on quality and red meat yield simultaneously.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

DISCOVERED YOUR PRINCE?

Don't settle for any old frog.

Quality is more than a black hide. Angus cattle earn profits at the sale barn and feedlot. Use high-quality Angus genetics to satisfy consumer demand and your bottom line.

Learn more about raising high-quality Angus cattle at CABpartners.com or call (877) 241-0717.

The brand that pays.™

OPTIMIZE YOUR HERD'S GENETIC POTENTIAL

INTRODUCING SOUTHERN STATES® GENETIC EXPRESSION BEEF NUTRITION PROGRAM

BUILD YOUR HERD POWER

- > Nutrition-based on life stage and management needs
- > Can be hand-fed or self-fed to meet your management needs
- > Incorporates organic selenium, Zinpro Availa 4®, Intellibond® and yeast compounds to support gut health, immunity, sperm quality and strong hooves
